1. (True/False) The Sum of Squared Errors (SSE) can be used to select the best-fitting regression model.

1/1 point

True

Correct! You can find more information in the Introduction to Linear Regression (Part 2) lesson.

O False

2. (True/False) The R-squared value from estimating a linear regression model will almost always increase if more features are added.

1/1 point

True

Correct! You can find more information in the Introduction to Linear Regression (Part2) lesson.

False

3. (True/False) The Total Sum of Squares (TSS) can be used to select the best-fitting regression model.

1/1 point

True

False

Incorrect. Please review the Introduction to Linear Regression (Part2) lesson.
